Transform Your Workplace with Mobile Unified Communications

The time is now for mobile employees to benefit from the unified communications (UC) revolution, and the Polycom® SpectraLink® 8400 series of Wi-Fi handsets is leading the way.

Demonstrably increasing worker productivity and organizational cost savings, the SpectraLink 8400 series of Wi-Fi phones allows on-site professionals to connect with customers, colleagues, and all the applications they need to perform their best. Uniquely designed for on-site requirements and workers in the healthcare, retail, hospitality, and manufacturing industries, the SpectraLink 8400 handset unites the most critical elements of workplace communications within a single mobile device that is highly reliable, extra durable, and easy to use.

Achieve Your Goals and Lower Your Costs

It's proven: You reduce liability by verifying records, decreasing errors, and improving safety. You increase sales by speeding response times, raising satisfaction, and preserving loyalty. And you minimize employee turnover by decreasing footsteps, reducing fatigue, and improving morale. The SpectraLink 8400 series handsets help your organization achieve every one of these operational objectives.

With the Polycom SpectraLink 8400 series, you also benefit from a lower total cost of ownership (TCO) and open standards designs that make it easy to integrate with your organization's Wi-Fi infrastructure, telephony systems, and business applications. This enables you to leverage your existing investments and evolve your mobile technology needs to meet your organizational changes.

More than a phone, more than a device—the Polycom SpectraLink handset is a revolution in workplace productivity. Using SpectraLink 8400 wireless telephones, organizations can improve service levels...reduce response times ...and make better decisions faster.

Extend Unified Communications to Mobile Professionals

The Polycom SpectraLink 8400 series enables mobile professionals to be reached immediately and reliably throughout your workplace. Whether attending to patients, customers, or guests, the SpectraLink 8400 series allows workers to fulfill their goals and deliver the very best care, service, and response times for any need. Instant alerts immediately notify workers of requests or emergencies, so they can deliver services that directly impact safety, sales, and satisfaction.

A Single Solution for the Corridor Warrior

What if your mobile workers could combine their mobile phone, pager, two-way radio, barcode scanner and voice-recognition badge into one device? Now they can. The SpectraLink 8400 handset provides exactly the right communication tools for mobile professionals in the workplace—all in one lightweight, simple-to-use, ergonomic device.

First, it's a business phone tied directly into the enterprise telephony system and related applications, such as corporate voice mail, voice-activated dialing, and directories. Like a "desk phone in the hand," the SpectraLink 8400 handset's high definition voice quality powers clear conversations.

Next, the new SpectraLink 8400 series handsets support text alerts and instant messaging that can replace overhead paging for a quieter environment that is better for workers, customers, and patients. Fully-integrated push-to-talk functionality makes it easy to instantly reach specialized teams within your organization, and eliminates the need for separate two-way radios. And with its user-friendly Web browser and application integration, the SpectraLink 8400 series provides fast, easy access to Web-based applications, reference tools, and procedure documents.

With unmatched interoperability and functionality, the SpectraLink 8400 delivers measurable return on investment and the lowest total cost of ownership.

A One-of-a-Kind Handheld Assistant

In addition, the SpectraLink 8450 handsets with built-in barcode readers are extremely powerful information portals to important resources and business critical databases. Patent-pending Polycom® Quick Barcode Connector™ software enables high-speed, error-free data entry so workers can quickly associate their SpectraLink 8450 handset with a PC for fast application integration, delivering the best of the mobility and desktop worlds.

Accessories for the SpectraLink 8400 series allow mobile professionals the ultimate in flexibility. The dual charger keeps the handset and spare battery ready-to-go, while the quad charger makes sure fully charged batteries are ready for every shift. The speakerphone dock charges the handset and spare battery, and also allows Polycom HD voice conferencing.

Polycom SpectraLink 8400 series handsets are tough, rugged, and built to outlive delicate cell phones, PDAs, and other consumer devices. They are resistant to water, dust, bacteria, and to dropping, even on concrete. Advanced features like the reinforced cage design, component shock mounting, rubberized over molding will keep your SpectraLink 8400 handset working for years to come.
