- 1 year parts & labour for all applications.

City Multi

Residential applications - 5 years parts & labour*.

Please note that the term City Multi residential application relates to a project where the property owner actually owns the City Multi system or systems.
In multi apartment projects, where tenants or residential owners share a VRF system, i.e. one condenser is shared by many tenants, 5 year warranty does not apply, this is considered to be a commercial application, see note below.

Commercial Applications - 2 years parts & 1 year labour*.

City Multi warranty is conditional on receipt of completed commissioning data sheets, available from this office, & commences from the date of commissioning.

When brazing refrigerant pipe work using Oxy Acetylene, it is a condition of our warranty that dry nitrogen be used at all times to ensure that no contamination occurs within the refrigerant circuit.

Warranty will not apply if the products are used for a purpose other than the cooling or heating of air for the physical comfort of humans.

PAYMENT TERMS

Nett 30 days following month of invoice issue, subject to credit approval.
If payment is made by cash or cheque, proof of payment will be required prior to despatch.

Credit Card payments will incur a 1.5% non-refundable transaction fee.
