

## It makes sense to protect your investment

*The aim of this part is to help you get the most from your wall covering and to keep it looking as good as the day it was laid.*

Aquarelle wall covering is wash- and brush- able.

It is important to avoid the accumulation of stains, in particular soap and shampoo splashes in bathrooms.

- **Daily/weekly :**

Simply wiping with a sponge and clean water, act immediately to eliminate most stains of "household" origin.

- **Monthly :**

It is also recommended to use a brush equipped with soft bristles with detergent diluted in warm water followed by rinsing with clean water.

- **Yearly**

We recommend a general cleaning using a detergent diluted in warm water.

In case of heavy soiling, you can use the same detergent by increasing the percentage of detergent in the dilution, followed by rinsing with clean water.

- **Specific stains (chewing gum, iodine, wax, lipstick...)**

Act immediately, pour a little part of alcohol (90° ) onto a clean cloth, dab in order to avoid spreading the stain, renew the operation if necessary. Always rinse well with clean water after removing stains.

**Note :**

In all cases, follow the instructions given by the manufacturers of the maintenance products (dilution rates, method of application...)

Avoid mixing products of different brands (risk of incompatibility).
